understanding allied to outstanding customer service
has helped us to grow our business and retain
customers from day one.**

—Enovation Solutions 2014

Our mission is to provide flexible technology solutions to support learning management in a global marketplace.

MIDDLE EAST

Our e-Learning Journey

At Enovation we take e-Learning technology seriously. We've been working in this sector since 2003 and in many ways we have educated the market in the use of cloud based learning management solutions. Helping our clients meet a growing demand for effective and engaging training in a cost effective and flexible manner.

We have taken a globally successful, license cost free product—*Moodle*—and stretched it to meet the particular requirements of our customers across the education, health, public, not for profit and corporate sectors. We're so good at implementing, managing and supporting these solutions that our reach extends to client companies across [Europe](#), [Middle East](#), [Africa](#) and [America](#).

Core Offering

At the core of our learning offering is a comprehensive learning management solution which helps organisations manage, deliver, track and assess learners across the learning program. Programs are constructed using a combination of the many possible activities within the system (assignments, branched learning, instant messaging, offline seminars, forums etc) together with any type of content (PDF, video, audio, word, powerpoint, animations etc). It is also possible to buy-in third party produced content to be included in these online programs.

Some of the key features are:

Web delivery model, no local installation necessary

Flexible learning—fully online / blended

Comprehensive assessment and tracking

Cost effective, fully managed solution

e-Learning Product Suite

With a diverse client base it is important that we understand their different e-Learning management needs. To address this diversity we have developed a number of plugins to Moodle which add considerable value to the base Moodle e-Learning platform.

These plugins add functionality around evidence based learning, regulatory compliance and CPD management as well as organisational talent management through mapped competency frameworks.

The e-Learning suite comprises:

- **LearningManager**
[Moodle + HE relevant plugins]
- **ComplianceManager**
[CPD & regulatory compliance management]
- **TalentManager**
[Manage organisational talent]

Comprehensive Managed Services

Underpinning our product suite is our team of experts who provide **professional support** to meet the needs of our customers. In many cases the solutions we provide our clients are more than e-Learning systems but complete education **management portals** comprising integrated content management[Drupal], e-Learning[Moodle+] and ePortfolio functionality. This breadth of technical expertise will enable us to roll-out advances in Moodle search capability using the SOLR enterprise search platform.

Education portal
Developed for GAA

Our professional services include:

Managed Hosting

We offer hosting (shared, dedicated and cloud) solutions tailored to the needs of our clients who range from schools through to large multi-nationals.

Managed Servers

We manage Linux servers across Europe, UA, Africa and Middle East offering the same advanced management and monitoring services as our hosted clients.

Moodle Customisation

Development of engaging education portals, responsive themes and addition of new functionality.

User Support

Our team provide support to client end users, administrators and technical staff to ensure the long term success of their e-Learning projects.

Integration

We have experience of integrating Moodle to student management systems, ERP systems, bespoke applications and SSO providers.

Training and Content

We provide comprehensive tailored training to our clients around a range of related products. We can also design and develop e-Learning courses using tools such as Articulate and Camtasia.

Enovation ComplianceManager

This is the latest extension to our Enovation Learning Suite. It facilitates the effective and efficient control and monitoring of training and supervision programs.

Empowering the employee with a simple and intuitive dashboard interface to allow them monitor and track their own compliance, CPD and personal development progress. Line managers have access to an aggregated dashboard of their reporting staff. In this way, they can monitor and pinpoint compliance risk areas and take positive and affirmative action to avert.

Key features of ComplianceManager are:

Notifications and Alerts

Facilitates configuration of thresholds for specific system events notifying line managers and staff when actions need to be taken.

Exam Manager

Provides employees an intuitive way to record the exams taken, scheduled and results achieved.

Mandatory Compliance Training

Easily define compliance training programs to be progressively rolled out over the course of the year. Monitors employees' progress and escalate risk of incompleteness as required.

CPD Manager

Allows employees to record CPD and managers to monitor CPD progress.

My Team

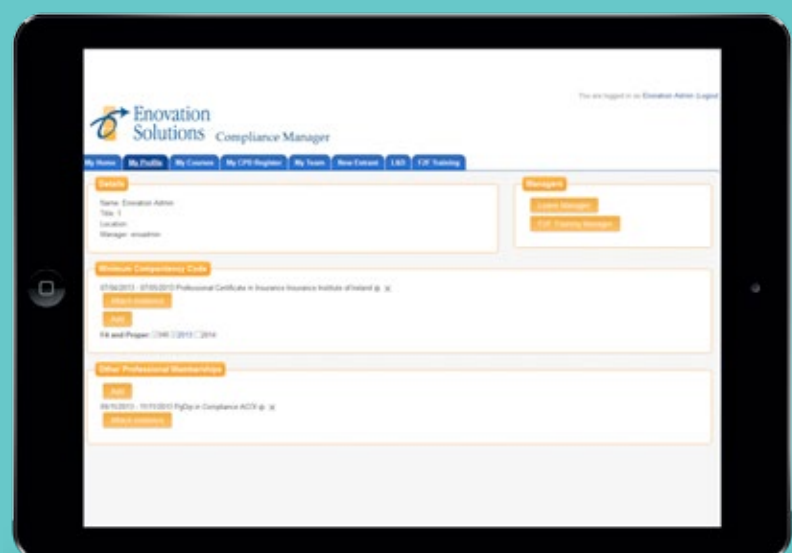

Providing managers with the information they need to take control of compliance training for their team.

On-boarding employees

Provision of structured new entrant programs.

Advanced Reports

Compliance reports that can be easily filtered by business units or risk level.
